GREAT IMPROVEMENT IN DENTIS-The attention of the public is called to a great

The attention of the public is called to a great discovery in Dentistry.

THE GREATEST ADVANCE STEP EVER MADE IN THE ART.

The main difficulty in wearing artificial teeth is, they do not hold in their place firmly enough, and add to this the annoyance of food getting under the plate while eating. I have discovered a method of so constructing the plate on which the teeth are set that they will not start or drop while eating or speaking, neither will or drop while eating or speaking, neither will any particles of food get under the plate, no matter what the condition of the mouth is, which is not true of any method hithertoused. I have secured Letters Patent for the United

States, England and France.

The improvement is not in material, but in the construction, whichs centres the atmospheric pressure on the entire plate.

I have sold the exclusive of said improvement

CIRCULAR.

The attention of Town Superintendent Teachers, and others interested in the cause of popular education in the State of Vermont is called to Section 2, Act No. 2, of the Laws of Vermont for the year 1866, which reads as fol-

lows:

Section 2.—The Board of Education are hereby authorized, and it is made their duty, on or befere July 1, 1867, and on or before said date every lifth year thereafter, to select a list of such grammars, geographics, arithmetics, histories of this State and the United States, philosophies, algebras, readers and spellers, not exceeding one book of a kind in each branch, as they shall deem best suited for instruction and use in the district schools in this State, in each of said branches; and shall cause the list so selected to be published in all the newspapers published in the State, during the month of January next following the making of such selection; and also to be inserted in each school register issued after one year from the making lection; and also to be inserted in each school register issued after one year from the making of such selection; which list, so selected, shall be and remain authoritative and linding upon the Board or Education, superintendents and teachers, and during five years from and after November 1, 1868, and each five years thereafter; and superintendents and teachers shall recommend for use in the district schools, as new books shall become necessary for instruction in the branches named, no other than the books included in said list so selected and published.

The following is an extract from the Report of the Board of Education, for the year 1867,

page 8 :

Mitchell's First Lessons, Primary, and Intermediate Geographics were adopted, for these reasons, in brief; the simplicity and clearness of the text, the gradual and constant advancement from the primary truths to the higher departments of geographical knowledge, the conciseness and completeness of the definitions, ciseness and completeness of the definitions, the elegance and accuracy of the maps, the attractiveness of the pictorial illustrations, and the uniform method of treating topics that are similar to cach other. Since the adoption of these books, the publishers have taken measures to prepare a special edition of the Intermediate Geography for use in the schools of Vermont. This edition will contain a new quarto map of the State, engraved on copperplate; and four pages of letter press and questions, relating to the geography of Vermont, to be prepared by Rev. Pliny H. White. It is believed that this feature, while it is not to increase the cost of the books, will materially increase its value and the interest with which it will be studied. McNally's Physical ocography, accompanied by and the interest with which it will be studied.

MeNally's Physical teography, accompanied by
Monteith's Lessons in Astronomy, was adopted,
to be used in those departments of the study
which are indic ted by their titles. Guyot's
Common School Geography was adopted as a
Physical Geography of a grade different from
McNally's.

Inasmuch as there seems to be some misap-prehension as to the intention and design of th Board in recommending the different text-book in geography, it seems proper to state that i was their intention to recommend the use of Mitchell's Geographies by all classes which have hitherto used, or which would otherwise use Cornell's, and that they did not design that Guyot's Geographics should be used, except by pupils who, having passed through Mitchell's, desire to advance to the study of physical geo-

graphy by Guyot's method. The publishers of Mitchell's New Geographies vill send agents into every town in the State, to supply schools according to the terms annexed, and it is hoped that superintendents will furnish every facility for the speedy prosecution of their

L. F. WARD, A. J. SANBORN, M. CLARKE, JOHN B. PAGE PLINY H. WHITE, JONATHAN ROSS D. D. GORHAM, State Board of Education,

Price List of Witchell's Geographies, FOR INTRODUCTION AND EXCHANGE.

Retail, Introd'et'n. Exchange. In calling attention of Superintendents and

Leachers to the above statement of the State Board of Education, the subscribers would say that, immediately upon the opening of the district schools, our travellers will visit each town in Vermont for the purpose of furnishing Mitchnll's New Geographies in exchange for those now in use. All persons interested, who may desire further information in relation to the exchange, will please address, Lonenzo B. Peck, Montpelier, Vt.

E. H. BUTLER & CO.
